University of Kansas, USA

Dr Brian Saunders
Consultant Gastroenterologist
St Marks Hospital, London, UK

Dr Kenshi Yao
Assistant Professor of Gastroenterology
Fukuoka University Chikushi Hospital, Fukuoka, Japan

3rd Nottingham Advanced Imaging & EndoTherapy Course

at The Village Hotel,
Brailsford Way, Nottingham
26-27 November 2009

I would like to invite you to attend this highly informative, interactive and hands on course focusing on advanced endoscopic imaging of the gut (HD, AFI, NBI, Chromoendoscopy etc..) and minimally invasive endoscopic therapy (EMR, ESD etc.). This course will be conducted over two days, starting with didactic lectures from national and international experts, video demonstration, interesting case discussions followed on by hands on training using the Erlangen Endotrainer (www.endo-trainer.de). There will be ample opportunity to have interactive discussions and hands on training with expert advice.

The course fees will include attendance to the lectures, hands on training, course handbook, unlimited refreshments during the course, lunch and course dinner with the faculty. I am grateful to Olympus-Keymed, for supporting this event with an unrestricted educational grant, since the cost of organising an event of this nature is in excess of the registration fees. CME accreditation has been applied for and should be made available soon.

I do hope that you will be able to register and attend this state of the art course.

Yours sincerely

Dr Krish Raganath MD FRCP
Associate Professor & Consultant Gastroenterologist
Nottingham Digestive Diseases Centre, NIHR Biomedical Research Unit
University Hospital Nottingham

TARGET AUDIENCE

The course will be of benefit to gastroenterologists, gastrointestinal surgeons, trainees in gastroenterology and surgery, general practitioners with special interest in endoscopy, nurse endoscopists, and any other personnel performing endoscopy.

LEARNING OBJECTIVES

By attending this course participants will be able to:

- Obtain an overview of recent advances in endoscopic imaging
- Understand the principles and practice of advanced imaging in endoscopy
- Identify and appreciate normal and abnormal microstructure of the gut
- Enhance pathology recognition during endoscopy
- Understand principles and practice of endotherapy
- Obtain hands on experience using the Erlangen Endotrainer

APPLICATION FORM

I would like to attend the 3rd Nottingham Advanced Imaging & Endotherapy Course being held on 26-27 November 2009.
