COURSE OBJECTIVES AND DESCRIPTION

The 28th GEEW follows the established successful pattern of combining live demonstrations with a direct interaction between the participants, the moderators and the experts performing the procedures.

The overall goal of this course is to provide information about current technology and to enhance knowledge in gastroenterology and endotherapy. Moreover, new techniques will be demonstrated and discussed with the audience, using voting system. The procedures will be performed by expert physicians selected for their outstanding teaching capabilities. Endotherapy is becoming more and more complex and fascinating new technologies have been implemented over the last few years. All of these will be demonstrated and future prospects will be discussed during live demonstrations and State of the Art lectures.

This meeting is not only designed for **endoscopists, gastroenterologists** and **surgeons** but also for **trainees** and **GI nurses**.

The meeting is taking place at the **BRUSSELS EXHIBITION CENTRE**, located in the North area of Brussels. The Workshop will be held in the **AUDITORIUM 2000**, a comfortable half circled meeting room guaranteeing perfect visibility of the screen. The **HALL 10** adjacent to the Auditorium 2000 will host the Technical Exhibition offering to the participants and companies a pleasant atmosphere for meetings and discussion.

The audio-visual transmission will be performed from 4 endoscopic suites located at Erasme Hospital and each procedure will be performed by 3 physicians, one being a member of the local staff.

Live video demonstrations will include endotherapy of esophageal diseases, GERD, superficial GI tumors, portal hypertension, upper GI bleeding, biliopancreatic, small bowel and colonic diseases, as well as percutaneous cholangiographies, transjugular liver biopsies, intraluminal surgery, EUS guided therapy and new techniques potentially deserving discussion.

2 medical quizzes on biliopancreatic diseases and gastrointestinal diseases will be presented.

State of the Art lectures will cover the most important and new fields of interest in therapeutic endoscopy and gastroenterology. Each half day of live demonstrations will be dedicated to a **precise topic in relationship with the State of the Art lecture**. This will however not be exclusive in order to illustrate the diversity of therapeutic endoscopy.

To encourage interactive discussion, each half day will end with a **GEEW Questions and Answers** time, led by a group of experts, to clarify and discuss the cases and the topic of the session.

At last, this year, we also offer an opportunity for poster presentation. Among the selected abstracts, the 5 best will be granted by a free registration.

We look forward to welcoming you in Brussels !

MAIN TOPICS AND PROCEDURES

- ▶ New diagnostic imaging in upper and lower gastrointestinal endoscopy
- ▶ Mucosal resection and submucosal dissection
- ▶ Hemostasis of bleeding ulcers and varices
- ▶ EUS for staging, FNA
- ▶ Capsule enteroscopy / colonoscopy
- ▶ Enteroscopy - Balloon assisted and other techniques
- ▶ Dilation of gastrointestinal strictures and stenting
- ▶ Endoscopic GERD treatments
- ▶ Endoluminal transoral surgery for morbid obesity
- ▶ Zenker's diverticulotomy
- ▶ NOTES
- ▶ Therapeutic ERCP
- ▶ Extracorporeal shock wave lithotripsy
- ▶ Therapeutic EUS - Transmural anastomoses - Pseudocysts drainage and necrosectomy
- ▶ Transjugular liver biopsies, TIPS
- ▶ Percutaneous transhepatic cholangiographies
- ▶ Treatment of surgical complications (stenoses, fistulae, leakages)
- ▶ Barrett's ablation
- ▶ Percutaneous gastrostomy and jejunostomy
- ▶ Endocytoscopy, confocal endoscopy
