Saturday Sunday **Monday** Tuesday Wednesday

Monday, October 22, 2012

Time/Halls	Hall 4/5	Auditorium	Elicium 2	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	D203/204	E104/105	E106/107	E103
08:00 - 10:30	Opening Plenary														
11:00 - 12:30	European Integration in Digestive Diseases: Successes and possibilities	Multidisciplinary challenges in ulcerative colitis: The medical/surgical partnership	Endoscopy meets Pathology: EMR and ESD	Management of chronic hepatitis C in 2012	Functional GI disorders: From children to adults	Barrett's oesophagus: How big is the cancer risk and how should we deal with it?	Clinics in Gastroenterology and Hepatology 1: Upper GI	Colorectal cancer therapy: New targets and biomarkers	Obesity and carcinogenesis: Insights into the obesity-cancer link from human observational studies	Free Paper Session: Immunosuppressive therapy in IBD	Free Paper Session: Improving accuracy in the diagnosis and management of colonic cancer	Free Paper Session: Biliary and pancreatic duct stenting	Free Paper Session: Gastric protection in upper GI bleeders	Free Paper Session: Optimising endotherapy of upper GI cancer	Free Paper Session: Intestinal ischaemia and short bowel syndrome
12:45 -13:45	Management of the patient with refractory nausea and vomiting	Upper GI bleeding: Tips and tricks	Pregnancy and IBD	Lunch Sessions (Rooms G102 – G109)			Approach to treatment of perianal Crohn's disease	Adenoma of the papilla vateri: Endoscopic therapy/Surgical therapy	How I manage patients with severe alcoholic hepatitis	How I manage side effects in patients treated with triple therapy for hepatitis C	Surveillance of high risk groups for colorectal cancer				
14:00 -15:30	The last 20 years: Lasting paradigm changes in digestive disease management	East meets West: Global perspectives on IBD and its mimics	Therapeutic EUS: Standards and perspectives	Genes and lifestyle: Role in liver disease	Nerve-immune interactions in the GI tract in health and disease	Epidemiology, detection and treatment of early gastric cancer	Management of groups at high risk of colorectal cancer	Free Paper Session: Endoluminal treatment of achalasia	Obesity and carcinogenesis: Metabolic syndrome, inflammation and carcinogenesis	Free Paper Session: Predictors of therapeutic outcome in IBD	Basic Science Workshop 1: Oncological decision making in 2012 – Are there reliable markers?	Free Paper Session: Diagnostic and interventional biliary endoscopy	Free Paper Session: Radiofrequency ablation of Barrett's oesophagus	Free Paper Session: Oesophageal motility disorders	Free Paper Session: HCC and liver transplantation
15:45 -17:15	The next 20 years: Today's science, tomorrow's medicine	Environmental factors in IBD pathogenesis: Implications for prognosis, prevention and treatment	Acute pancreatitis: Up to date management	Liver tumours and obesity	Free Paper Session: Therapeutic biliopancreatic EUS	Advances and controversies in gastric malignancies	Management of the difficult patient with IBS	Challenges in the diagnosis and treatment of rectal cancer	Free Paper Session: Today's science, tomorrow's medicine: Obesity and cancer risk	Free Paper Session: IBD and malignancy	Free Paper Session: Endoscopic and surgical interventions in the oesophagus	Free Paper Session: Advanced imaging in endoscopy	Free Paper Session: GORD: Manifestations, management and complications	Free Paper Session: Gut mechanism of satiation and safety	Free Paper Session: A: Biliary neoplasia; B: basic mechanisms of liver injury (3 and 3 abs)

Saturday Sunday Monday **Tuesday** Wednesday

Tuesday, October 23, 2012

Time/Halls	Hall 4/5	Auditorium	Elicium 2	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	D203/204	E104/105	E106/107	E103	
08:30 - 10:30	Live endoscopy	Developments in bowel cancer screening	New therapeutic approaches for IBD: From bench to bedside	How to keep the decompensated cirrhotic alive: Case-based sessions	Free Paper Session: Popular Late Breakers	Free Paper Session: Coeliac disease	Current issues in GORD management	Free Paper Session: Viral hepatitis: Clinical and basic	Obesity and carcinogenesis: Adipokines and energy balance	Cystic fibrosis: Moving from children to adults	Molecular pathology & genetics of IBD	Free Paper Session: Upper GI diseases: Endoscopic diagnosis and management	Free Paper Session: Modern management of gastric cancer	Horizon 2020: Larger funds than ever for researchers	Free Paper Session: Pancreatic cancer: From pathophysiology to diagnosis and treatment	
11:00 - 12:30	Live endoscopy	Cochrane Symposium: Evidence-base for disease prevention: Past and future	Free Paper Session: IBD safety and Infections	Management of chronic hepatitis B in 2012	Clinical challenges in dysphagia management (including EoE)	Recent major advances in pancreatology	Clinics in Gastroenterology and Hepatology 2: Lower GI	Complications of bariatric surgery	Obesity and carcinogenesis: Host intestinal microbiota interactions	Free Paper Session: H. pylori infection management and gastric tumorigenesis	Free Paper Session: IBD pathogenesis and microbiota	Free Paper Session: Progression of Barrett's to adenocarcinoma	Free Paper Session: Colorectal surgery	Free Paper Session: Progress in severe GI motility diseases	Free Paper Session: Insights into colorectal cancer pathogenesis	
12:45 - 13:45	Oesophageal stenting: Tips for success	Severe gastric atrophy and intestinal metaplasia in the stomach: What follow-up?	Drug development in functional GI disorders: How should it be achieved?	Lunch Sessions (Rooms G102 – G109)				Management of acute diverticulitis	Management of pancreatic collections							
14:00 -15:30	Live endoscopy	Best of DDW	New insights into IBD pathogenesis	Hepatocellular carcinoma management in 2012: A multidisciplinary approach	New treatment targets for functional GI disorders and GI motility diseases	Improving outcomes in colorectal cancer	Dyspepsia in the community	Advances in clinical nutrition	Obesity and carcinogenesis: ER stress, oxidative stress and autophagy	Free Paper Session: Late Breakers - 2nd Choice	Basic Science Workshop 2: Mechanism of pain development in GI-disease - Do we know enough?	Free Paper Session: Microbiota in IBD: Therapeutic interventions	Free Paper Session: Progress in capsule endoscopy	Free Paper Session: Neuroimmune interactions in the GI tract: From bench to bedside	Free Paper Session: Acute Pancreatitis: From Bench to Bedside	
15:45 -17:15	Video Case Session	Helicobacter pylori treatment: How and in whom?	Free Paper Session: Novel therapies in IBD	Common incidental findings affecting the liver and how to manage them	Placebos and placebo effects in gastroenterology	Palliation of advanced colorectal cancer	Free Paper Session: Brain-gut interactions	Management of obesity and the metabolic syndrome	Free Paper Session: NAFLD: Clinical and basic	Free Paper Session: Colonoscopic resection of large polyps	Free Paper Session: Diagnosis and outcome of oesophageal cancer	Free Paper Session: Imaging in IBD management	Free Paper Session: Stool-based screening for colorectal cancer	Free Paper Session: Signalling in healthy and inflamed intestinal mucosa	Free Paper Session: Pancreatic disease: Fibrosis, inflammation and signalling

Saturday Sunday Monday Tuesday **Wednesday**

Wednesday, October 24, 2012

Time/Halls	Hall 4/5	Auditorium	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	E104/105	E103				
08:00 - 10:30		Future vision of endoscopy: European and Japanese perspectives	Cholestatic diseases in clinical practise: An update based on clinical cases	Coeliac disease: A changing paradigm?	Treatment of Barrett's oesophagus	Ulverative colitis: Difficult management issues	Free Paper Session: Anti-TNF therapy in IBD	Neuroendocrine tumours: Beyond octreotide	Free Paper Session: GORD: Evaluation, diagnosis and management	Free Paper Session: Colorectal cancer screening and surveillance	Free Paper Session: Complications of cirrhosis: Evaluation and management	Free Paper Session: New endoscopic and imaging technologies				
11:00 - 12:30		CT-colongraphy vs colonoscopy	Evidence based medicine in pancreatology	Bloating and abdominal distension: New insights into underlying mechanisms and clinical management	Modern management of oesophageal cancer	Clinics in Gastroenterology and Hepatology 3: Liver, Bile & Pancreas	Free Paper Session: New therapeutic targets in IBD	Bone mineral disease in GI disorders	Free Paper Session: NSAIDS and upper GI bleeding	Free Paper Session: Pancreatic EUS in diagnosis and treatment	Free Paper Session: Gallstones and other biliary diseases	Free Paper Session: Prognosis and treatment of colorectal cancer				
12:45-13:45	How to deal with gluten sensitivity	Psychological treatment options for patients with IBS	Lunch Sessions (Rooms G102 – G109)													
			Managing anti-TNF therapy: Starting and loss of response	Pitfalls in autoimmune pancreatitis	How to advise colleagues regarding hepatitis B patients undergoing immunosuppression	Management of acute lower GI bleeding	Treatment of end-stage jaundice / palliative biliary drainage									
14:00 -15:30			Alcoholic and non-alcoholic liver disease: Staging and treatment	Effect of food on GI function and dysfunction	Management of complications of pancreatic and biliary surgery	IBD: A personalised medicine approach	Biology and treatment of GISTs (Gastro-intestinal stromal tumours)	Free Paper Session: Course and outcomes of IBD	Free Paper Session: Upper GI bleeding: An international perspective	Free Paper Session: ESD: The way to go?	Free Paper Session: New pharmacological treatment options for lower GI diseases	Free Paper Session: Colorectal cancer biomarkers

Saturday Sunday Monday Tuesday Wednesday

Saturday, October 20, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium	Elicium 1
09:00 - 10:30	Management of GI and liver emergencies			
11:00 - 13:00	Live endoscopy	Case-based update on management of viral hepatitis	Nutrition in IBD and other GI disorders	Fistulizing Crohn's disease
14:00 - 16:30	Live endoscopy	Hepatocellular carcinoma	Characterising and managing IBD today	Management of pancreatic and biliary cancer

Sunday, October 21, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium
08:30 - 10:30	ERCP update	Alcohol and liver disease	Modern medical and surgical management of difficult GORD
11:00 - 13:00	Colonoscopy challenges	What is new and what is controversial about NAFLD?	Assessment and treatment of motility disorders: Medical and surgical issues
14:00 - 16:00	The multidisciplinary approach to morbid obesity		

Basic Science	Cancer	Chairman's Choice	Endoscopy	H. Pylori / Stomach	Histopathology	IBD	Liver	Neurogastroenterology	Nutrition and Small Intestine	Obesity-related disease	Oesophagus	Paediatric	Pancreas	Primary Care	Radiology	Surgery

Endoscopy

Saturday Sunday Monday Tuesday Wednesday

Saturday, October 20, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium	Elicium 1
09:00 - 10:30	Management of GI and liver emergencies			
11:00 - 13:00	Live endoscopy	Case-based update on management of viral hepatitis	Nutrition in IBD and other GI disorders	Fistulizing Crohn's disease
14:00 - 16:30	Live endoscopy	Hepatocellular carcinoma	Characterising and managing IBD today	Management of pancreatic and biliary cancer

Sunday, October 21, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium
08:30 - 10:30	ERCP update	Alcohol and liver disease	Modern medical and surgical management of difficult GORD
11:00 - 13:00	Colonoscopy challenges	What is new and what is controversial about NAFLD?	Assessment and treatment of motility disorders: Medical and surgical issues
14:00 - 16:00	The multidisciplinary approach to morbid obesity		

Basic Science Cancer Chairman's Choice Endoscopy *H. Pylori*/Stomach Histopathology IBD Liver Neurogastroenterology Nutrition and Small Intestine Obesity-related disease Oesophagus Paediatric Pancreas Primary Care Radiology Surgery

Endoscopy

Saturday Sunday **Monday** Tuesday Wednesday

Monday, October 22, 2012

Time/Halls	Hall 4/5	Auditorium	Elicium 2	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	D203/204	E104/105	E106/107	E103
08:00 - 10:30	Opening Plenary														
11:00 - 12:30	European Integration in Digestive Diseases: Successes and possibilities	Multidisciplinary challenges in ulcerative colitis: The medical/surgical partnership	Endoscopy meets Pathology: EMR and ESD	Management of chronic hepatitis C in 2012	Functional GI disorders: From children to adults	Barrett's oesophagus: How big is the cancer risk and how should we deal with it?	Clinics in Gastroenterology and Hepatology 1: Upper GI	Colorectal cancer therapy: New targets and biomarkers	Obesity and carcinogenesis: Insights into the obesity-cancer link from human observational studies	Free Paper Session: Immunosuppressive therapy in IBD	Free Paper Session: Improving accuracy in the diagnosis and management of colonic cancer	Free Paper Session: Biliary and pancreatic duct stenting	Free Paper Session: Gastric protection in upper GI bleeders	Free Paper Session: Optimising endotherapy of upper GI cancer	Free Paper Session: Intestinal ischaemia and short bowel syndrome
12:45 -13:45	Management of the patient with refractory nausea and vomiting	Upper GI bleeding: Tips and tricks	Pregnancy and IBD	Lunch Sessions (Rooms G102 – G109)			Approach to treatment of perianal Crohn's disease	Adenoma of the papilla vateri: Endoscopic therapy/Surgical therapy	How I manage patients with severe alcoholic hepatitis	How I manage side effects in patients treated with triple therapy for hepatitis C	Surveillance of high risk groups for colorectal cancer				
14:00 -15:30	The last 20 years: Lasting paradigm changes in digestive disease management	East meets West: Global perspectives on IBD and its mimics	Therapeutic EUS: Standards and perspectives	Genes and lifestyle: Role in liver disease	Nerve-immune interactions in the GI tract in health and disease	Epidemiology, detection and treatment of early gastric cancer	Management of groups at high risk of colorectal cancer	Free Paper Session: Endoluminal treatment of achalasia	Obesity and carcinogenesis: Metabolic syndrome, inflammation and carcinogenesis	Free Paper Session: Predictors of therapeutic outcome in IBD	Basic Science Workshop 1: Oncological decision making in 2012 - Are there reliable markers?	Free Paper Session: Diagnostic and interventional biliary endoscopy	Free Paper Session: Radiofrequency ablation of Barrett's oesophagus	Free Paper Session: Oesophageal motility disorders	Free Paper Session: HCC and liver transplantation
15:45 -17:15	The next 20 years: Today's science; tomorrow's medicine	Environmental factors in IBD pathogenesis: Implications for prognosis, prevention and treatment	Acute pancreatitis: Up to date management	Liver tumours and obesity	Free Paper Session: Therapeutic biliopancreatic EUS	Advances and controversies in gastric malignancies	Management of the difficult patient with IBS	Challenges in the diagnosis and treatment of rectal cancer	Free Paper Session: Today's science; tomorrow's medicine: Obesity and cancer risk	Free Paper Session: IBD and malignancy	Free Paper Session: Endoscopic and surgical interventions in the oesophagus	Free Paper Session: Advanced imaging in endoscopy	Free Paper Session: GORD: Manifestations, management and complications	Free Paper Session: Gut mechanism of satiation and satiety	Free Paper Session: A: Biliary neoplasia; B: basic mechanisms of liver injury (3 and 3 abs)

Basic Science Cancer Chairman's Choice Endoscopy *H. Pylori* / Stomach Histopathology IBD Liver Neurogastroenterology Nutrition and Small Intestine Obesity-related disease Oesophagus Paediatric Pancreas Primary Care Radiology Surgery

Endoscopy

Saturday Sunday Monday **Tuesday** Wednesday

Tuesday, October 23, 2012

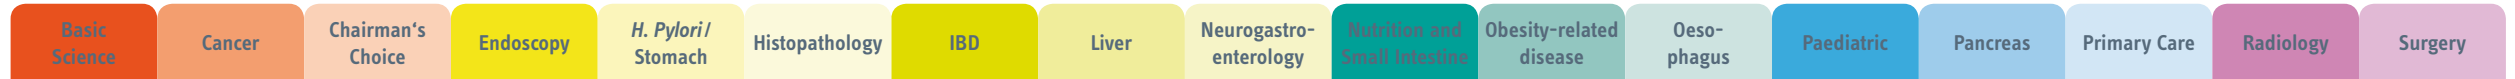

Time/Halls	Hall 4/5	Auditorium	Elicium 2	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	D203/204	E104/105	E106/107	E103
08:30 - 10:30	Live endoscopy	Developments in bowel cancer screening	New therapeutic approaches for IBD: From bench to bedside	How to keep the decompensated cirrhotic alive: Case-based sessions	Free Paper Session: Popular Late Breakers	Free Paper Session: Coeliac disease	Current issues in GORD management	Free Paper Session: Viral hepatitis: Clinical and basic	Obesity and carcinogenesis: Adipokines and energy balance	Cystic fibrosis: Moving from children to adults	Molecular pathology & genetics of IBD	Free Paper Session: Upper GI diseases: Endoscopic diagnosis and management	Free Paper Session: Modern management of gastric cancer	Horizon 2020: Larger funds than ever for researchers	Free Paper Session: Pancreatic cancer: From pathophysiology to diagnosis and treatment
11:00 - 12:30	Live endoscopy	Cochrane Symposium: Evidence-base for disease prevention: Past and future	Free Paper Session: IBD safety and Infections	Management of chronic hepatitis B in 2012	Clinical challenges in dysphagia management (including EoE)	Recent major advances in pancreatology	Clinics in Gastroenterology and Hepatology 2: Lower GI	Complications of bariatric surgery	Obesity and carcinogenesis: Host intestinal microbiota interactions	Free Paper Session: H. pylori infection management and gastric tumorigenesis	Free Paper Session: IBD pathogenesis and microbiota	Free Paper Session: Progression of Barrett's to adenocarcinoma	Free Paper Session: Colorectal surgery	Free Paper Session: Progress in severe GI motility diseases	Free Paper Session: Insights into colorectal cancer pathogenesis
12:45 - 13:45	Oesophageal stenting: Tips for success	Severe gastric atrophy and intestinal metaplasia in the stomach: What follow-up?	Drug development in functional GI disorders: How should it be achieved?	Lunch Sessions (Rooms G102 – G109)											
				Best practice in colonoscopic surveillance after polypectomy	Balancing efficacy and safety of immunosuppressants in IBD	Who are the patients that really benefit from a noninvasive diagnosis of liver fibrosis	Management of acute diverticulitis	Management of pancreatic collections							
14:00 -15:30	Live endoscopy	Best of DDW	New insights into IBD pathogenesis	Hepatocellular carcinoma management in 2012: A multidisciplinary approach	New treatment targets for functional GI disorders and GI motility diseases	Improving outcomes in colorectal cancer	Dyspepsia in the community	Advances in clinical nutrition	Obesity and carcinogenesis: ER stress, oxidative stress and autophagy	Free Paper Session: Late Breakers - 2nd Choice	Basic Science Workshop 2: Mechanism of pain development in GI-disease - Do we know enough?	Free Paper Session: Microbiota in IBD: Therapeutic interventions	Free Paper Session: Progress in capsule endoscopy	Free Paper Session: Neuroimmune interactions in the GI tract: From bench to bedside	Free Paper Session: Acute Pancreatitis: From Bench to Bedside
15:45 -17:15	Video Case Session	Helicobacter pylori treatment: How and in whom?	Free Paper Session: Novel therapies in IBD	Common incidental findings affecting the liver and how to manage them	Placebos and placebo effects in gastroenterology	Palliation of advanced colorectal cancer	Free Paper Session: Brain-gut interactions	Management of obesity and the metabolic syndrome	Free Paper Session: NAFLD: Clinical and basic	Free Paper Session: Colonoscopic resection of large polyps	Free Paper Session: Diagnosis and outcome of oesophageal cancer	Free Paper Session: Imaging in IBD management	Free Paper Session: Stool-based screening for colorectal cancer	Free Paper Session: Signalling in healthy and inflamed intestinal mucosa	Free Paper Session: Pancreatic disease: Fibrosis, inflammation and signalling

Endoscopy

Saturday Sunday Monday Tuesday **Wednesday**

Wednesday, October 24, 2012

Time/Halls	Hall 4/5	Auditorium	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	E104/105	E103				
08:00 - 10:30		Future vision of endoscopy: European and Japanese perspectives	Cholestatic diseases in clinical practise: An update based on clinical cases	Coeliac disease: A changing paradigm?	Treatment of Barrett's oesophagus	Ulverative colitis: Difficult management issues	Free Paper Session: Anti-TNF therapy in IBD	Neuroendocrine tumours: Beyond octreotide	Free Paper Session: GORD: Evaluation, diagnosis and management	Free Paper Session: Colorectal cancer screening and surveillance	Free Paper Session: Complications of cirrhosis: Evaluation and management	Free Paper Session: New endoscopic and imaging technologies				
11:00 - 12:30		CT-colongraphy vs colonoscopy	Evidence based medicine in pancreatology	Bloating and abdominal distension: New insights into underlying mechanisms and clinical management	Modern management of oesophageal cancer	Clinics in Gastroenterology and Hepatology 3: Liver, Bile & Pancreas	Free Paper Session: New therapeutic targets in IBD	Bone mineral disease in GI disorders	Free Paper Session: NSAIDS and upper GI bleeding	Free Paper Session: Pancreatic EUS in diagnosis and treatment	Free Paper Session: Gallstones and other biliary diseases	Free Paper Session: Prognosis and treatment of colorectal cancer				
12:45-13:45	How to deal with gluten sensitivity	Psychological treatment options for patients with IBS	Lunch Sessions (Rooms G102 – G109)				Managing anti-TNF therapy: Starting and loss of response	Pitfalls in autoimmune pancreatitis	How to advise colleagues regarding hepatitis B patients undergoing immunosuppression	Management of acute lower GI bleeding	Treatment of end-stage jaundice / palliative biliary drainage					
14:00 -15:30			Alcoholic and non-alcoholic liver disease: Staging and treatment	Effect of food on GI function and dysfunction	Management of complications of pancreatic and biliary surgery	IBD: A personalised medicine approach	Biology and treatment of GISTs (Gastro-intestinal stromal tumours)	Free Paper Session: Course and outcomes of IBD	Free Paper Session: Upper GI bleeding: An international perspective	Free Paper Session: ESD: The way to go?	Free Paper Session: New pharmacological treatment options for lower GI diseases	Free Paper Session: Colorectal cancer biomarkers

IBD

Saturday Sunday Monday Tuesday Wednesday

Saturday, October 20, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium	Elicium 1
09:00 - 10:30	Management of GI and liver emergencies			
11:00 - 13:00	Live endoscopy	Case-based update on management of viral hepatitis	Nutrition in IBD and other GI disorders	Fistulizing Crohn's disease
14:00 - 16:30	Live endoscopy	Hepatocellular carcinoma	Characterising and managing IBD today	Management of pancreatic and biliary cancer

Sunday, October 21, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium
08:30 - 10:30	ERCP update	Alcohol and liver disease	Modern medical and surgical management of difficult GORD
11:00 - 13:00	Colonoscopy challenges	What is new and what is controversial about NAFLD?	Assessment and treatment of motility disorders: Medical and surgical issues
14:00 - 16:00	The multidisciplinary approach to morbid obesity		

Saturday Sunday **Monday** Tuesday Wednesday

Monday, October 22, 2012

Time/Halls	Hall 4/5	Auditorium	Elicium 2	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	D203/204	E104/105	E106/107	E103
08:00 - 10:30	Opening Plenary														
11:00 - 12:30	European Integration in Digestive Diseases: Successes and possibilities	Multidisciplinary challenges in ulcerative colitis: The medical/surgical partnership	Endoscopy meets Pathology: EMR and ESD	Management of chronic hepatitis C in 2012	Functional GI disorders: From children to adults	Barrett's oesophagus: How big is the cancer risk and how should we deal with it?	Clinics in Gastroenterology and Hepatology 1: Upper GI	Colorectal cancer therapy: New targets and biomarkers	Obesity and carcinogenesis: Insights into the obesity-cancer link from human observational studies	Free Paper Session: Immunosuppressive therapy in IBD	Free Paper Session: Improving accuracy in the diagnosis and management of colonic cancer	Free Paper Session: Biliary and pancreatic duct stenting	Free Paper Session: Gastric protection in upper GI bleeders	Free Paper Session: Optimising endotherapy of upper GI cancer	Free Paper Session: Intestinal ischaemia and short bowel syndrome
12:45 -13:45	Management of the patient with refractory nausea and vomiting	Upper GI bleeding: Tips and tricks	Pregnancy and IBD	Approach to treatment of perianal Crohn's disease	Adenoma of the papilla vateri: Endoscopic therapy/Surgical therapy	How I manage patients with severe alcoholic hepatitis	How I manage side effects in patients treated with triple therapy for hepatitis C	Surveillance of high risk groups for colorectal cancer							
Lunch Sessions (Rooms G102 – G109)															
14:00 -15:30	The last 20 years: Lasting paradigm changes in digestive disease management	East meets West: Global perspectives on IBD and its mimics	Therapeutic EUS: Standards and perspectives	Genes and lifestyle: Role in liver disease	Nerve-immune interactions in the GI tract in health and disease	Epidemiology, detection and treatment of early gastric cancer	Management of groups at high risk of colorectal cancer	Free Paper Session: Endoluminal treatment of achalasia	Obesity and carcinogenesis: Metabolic syndrome, inflammation and carcinogenesis	Free Paper Session: Predictors of therapeutic outcome in IBD	Basic Science Workshop 1: Oncological decision making in 2012 - Are there reliable markers?	Free Paper Session: Diagnostic and interventional biliary endoscopy	Free Paper Session: Radiofrequency ablation of Barrett's oesophagus	Free Paper Session: Oesophageal motility disorders	Free Paper Session: HCC and liver transplantation
15:45 -17:15	The next 20 years: Today's science; tomorrow's medicine	Environmental factors in IBD pathogenesis: Implications for prognosis, prevention and treatment	Acute pancreatitis: Up to date management	Liver tumours and obesity	Free Paper Session: Therapeutic biliopancreatic EUS	Advances and controversies in gastric malignancies	Management of the difficult patient with IBS	Challenges in the diagnosis and treatment of rectal cancer	Free Paper Session: Today's science; tomorrow's medicine: Obesity and cancer risk	Free Paper Session: IBD and malignancy	Free Paper Session: Endoscopic and surgical interventions in the oesophagus	Free Paper Session: Advanced imaging in endoscopy	Free Paper Session: GORD: Manifestations, management and complications	Free Paper Session: Gut mechanism of satiation and satiety	Free Paper Session: A: Biliary neoplasia; B: basic mechanisms of liver injury (3 and 3 abs)

Saturday Sunday Monday **Tuesday** Wednesday

Tuesday, October 23, 2012

Time/Halls	Hall 4/5	Auditorium	Elicium 2	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	D203/204	E104/105	E106/107	E103	
08:30 - 10:30	Live endoscopy	Developments in bowel cancer screening	New therapeutic approaches for IBD: From bench to bedside	How to keep the decompensated cirrhotic alive: Case-based sessions	Free Paper Session: Popular Late Breakers	Free Paper Session: Coeliac disease	Current issues in GORD management	Free Paper Session: Viral hepatitis: Clinical and basic	Obesity and carcinogenesis: Adipokines and energy balance	Cystic fibrosis: Moving from children to adults	Molecular pathology & genetics of IBD	Free Paper Session: Upper GI diseases: Endoscopic diagnosis and management	Free Paper Session: Modern management of gastric cancer	Horizon 2020: Larger funds than ever for researchers	Free Paper Session: Pancreatic cancer: From pathophysiology to diagnosis and treatment	
11:00 - 12:30	Live endoscopy	Cochrane Symposium: Evidence-base for disease prevention: Past and future	Free Paper Session: IBD safety and infections	Management of chronic hepatitis B in 2012	Clinical challenges in dysphagia management (including EoE)	Recent major advances in pancreatology	Clinics in Gastroenterology and Hepatology 2: Lower GI	Complications of bariatric surgery	Obesity and carcinogenesis: Host intestinal microbiota interactions	Free Paper Session: H. pylori infection management and gastric tumorigenesis	Free Paper Session: IBD pathogenesis and microbiota	Free Paper Session: Progression of Barrett's to adenocarcinoma	Free Paper Session: Colorectal surgery	Free Paper Session: Progress in severe GI motility diseases	Free Paper Session: Insights into colorectal cancer pathogenesis	
12:45 - 13:45	Oesophageal stenting: Tips for success	Severe gastric atrophy and intestinal metaplasia in the stomach: What follow-up?	Drug development in functional GI disorders: How should it be achieved?	Lunch Sessions (Rooms G102 – G109)				Management of acute diverticulitis	Management of pancreatic collections							
14:00 - 15:30	Live endoscopy	Best of DDW	New insights into IBD pathogenesis	Hepatocellular carcinoma management in 2012: A multidisciplinary approach	New treatment targets for functional GI disorders and GI motility diseases	Improving outcomes in colorectal cancer	Dyspepsia in the community	Advances in clinical nutrition	Obesity and carcinogenesis: ER stress, oxidative stress and autophagy	Free Paper Session: Late Breakers - 2nd Choice	Basic Science Workshop 2: Mechanism of pain development in GI-disease - Do we know enough?	Free Paper Session: Microbiota in IBD: Therapeutic interventions	Free Paper Session: Progress in capsule endoscopy	Free Paper Session: Neuroimmune interactions in the GI tract: From bench to bedside	Free Paper Session: Acute Pancreatitis: From Bench to Bedside	
15:45 - 17:15	Video Case Session	Helicobacter pylori treatment: How and in whom?	Free Paper Session: Novel therapies in IBD	Common incidental findings affecting the liver and how to manage them	Placebos and placebo effects in gastroenterology	Palliation of advanced colorectal cancer	Free Paper Session: Brain-gut interactions	Management of obesity and the metabolic syndrome	Free Paper Session: NAFLD: Clinical and basic	Free Paper Session: Colonoscopic resection of large polyps	Free Paper Session: Diagnosis and outcome of oesophageal cancer	Free Paper Session: Imaging in IBD management	Free Paper Session: Stool-based screening for colorectal cancer	Free Paper Session: Signalling in healthy and inflamed intestinal mucosa	Free Paper Session: Pancreatic disease: Fibrosis, inflammation and signalling

Neurogastroenterology and Motility

Saturday Sunday Monday Tuesday **Wednesday**

Wednesday, October 24, 2012

Time/Halls	Hall 4/5	Auditorium	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	E104/105	E103			
08:00 - 10:30		Future vision of endoscopy: European and Japanese perspectives	Cholestatic diseases in clinical practise: An update based on clinical cases	Coeliac disease: A changing paradigm?	Treatment of Barrett's oesophagus	Ulverative colitis: Difficult management issues	Free Paper Session: Anti-TNF therapy in IBD	Neuroendocrine tumours: Beyond octreotide	Free Paper Session: GORD: Evaluation, diagnosis and management	Free Paper Session: Colorectal cancer screening and surveillance	Free Paper Session: Complications of cirrhosis: Evaluation and management	Free Paper Session: New endoscopic and imaging technologies			
11:00 - 12:30		CT-colongraphy vs colonoscopy	Evidence based medicine in pancreatology	Bloating and abdominal distension: New insights into underlying mechanisms and clinical management	Modern management of oesophageal cancer	Clinics in Gastroenterology and Hepatology 3: Liver, Bile & Pancreas	Free Paper Session: New therapeutic targets in IBD	Bone mineral disease in GI disorders	Free Paper Session: NSAIDS and upper GI bleeding	Free Paper Session: Pancreatic EUS in diagnosis and treatment	Free Paper Session: Gallstones and other biliary diseases	Free Paper Session: Prognosis and treatment of colorectal cancer			
12:45-13:45	How to deal with gluten sensitivity	Psychological treatment options for patients with IBS	Lunch Sessions (Rooms G102 – G109)												
		Managing anti-TNF therapy: Starting and loss of response	Pitfalls in autoimmune pancreatitis	How to advise colleagues regarding hepatitis B patients undergoing immunosuppression	Management of acute lower GI bleeding	Treatment of end-stage jaundice / palliative biliary drainage									
14:00 -15:30		Alcoholic and non-alcoholic liver disease: Staging and treatment	Effect of food on GI function and dysfunction	Management of complications of pancreatic and biliary surgery	IBD: A personalised medicine approach	Biology and treatment of GISTs (Gastro-intestinal stromal tumours)	Free Paper Session: Course and outcomes of IBD	Free Paper Session: Upper GI bleeding: An international perspective	Free Paper Session: ESD: The way to go?	Free Paper Session: New pharmacological treatment options for lower GI diseases	Free Paper Session: Colorectal cancer biomarkers				

Nutrition and Small Intestine

Saturday Sunday Monday Tuesday Wednesday

Saturday, October 20, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium	Elicium 1
09:00 - 10:30	Management of GI and liver emergencies			
11:00 - 13:00	Live endoscopy	Case-based update on management of viral hepatitis	Nutrition in IBD and other GI disorders	Fistulizing Crohn's disease
14:00 - 16:30	Live endoscopy	Hepatocellular carcinoma	Characterising and managing IBD today	Management of pancreatic and biliary cancer

Sunday, October 21, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium
08:30 - 10:30	ERCP update	Alcohol and liver disease	Modern medical and surgical management of difficult GORD
11:00 - 13:00	Colonoscopy challenges	What is new and what is controversial about NAFLD	Assessment and treatment of motility disorders: Medical and surgical issues
14:00 - 16:00	The multidisciplinary approach to morbid obesity		

Nutrition and Small Intestine

Saturday Sunday **Monday** Tuesday Wednesday

Monday, October 22, 2012

Time/Halls	Hall 4/5	Auditorium	Elicium 2	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	D203/204	E104/105	E106/107	E103	
08:00 - 10:30	Opening Plenary															
11:00 - 12:30	European Integration in Digestive Diseases: Successes and possibilities	Multidisciplinary challenges in ulcerative colitis: The medical/ surgical partnership	Endoscopy meets Pathology: EMR and ESD	Management of chronic hepatitis C in 2012	Functional GI disorders: From children to adults	Barrett's oesophagus: How big is the cancer risk and how should we deal with it?	Clinics in Gastroenterology and Hepatology - Upper GI	Colorectal cancer therapy: New targets and biomarkers	Obesity and carcinogenesis: Insights into the obesity-cancer link from human observational studies	Free Paper Session: Immunosuppressive therapy in IBD	Free Paper Session: Improving accuracy in the diagnosis and management of colonic cancer	Free Paper Session: Biliary and pancreatic duct stenting	Free Paper Session: Gastric protection in upper GI bleeders	Free Paper Session: Optimising endotherapy of upper GI cancer	Free Paper Session: Intestinal ischaemia and short bowel syndrome	
12:45 -13:45	Management of the patient with refractory nausea and vomiting	Upper GI bleeding: Tips and tricks	Pregnancy and IBD	Lunch Sessions (Rooms G102 – G109)				Approach to treatment of perianal Crohn's disease	Adenoma of the papilla vateri: Endoscopic therapy/Surgical therapy	How I manage patients with severe alcoholic hepatitis	How I manage side effects in patients treated with triple therapy for hepatitis C	Surveillance of high risk groups for colorectal cancer				
14:00 -15:30	The last 20 years: Lasting paradigm changes in digestive disease management	East meets West: Global perspectives on IBD and its mimics	Therapeutic EUS: Standards and perspectives	Genes and Lifestyle: Role in Liver disease	Nerve-immune interactions in the GI tract in health and disease	Epidemiology, detection and treatment of early gastric cancer	Management of groups at high risk of colorectal cancer	Free Paper Session: Endoluminal treatment of achalasia	Obesity and carcinogenesis: Metabolic syndrome, inflammation and carcinogenesis	Free Paper Session: Predictors of therapeutic outcome in IBD	Basic Science Workshop 1: Oncological decision making in 2012 - Are there reliable markers?	Free Paper Session: Diagnostic and interventional biliary endoscopy	Free Paper Session: Radiofrequency ablation of Barrett's oesophagus	Free Paper Session: Oesophageal motility disorders	Free Paper Session: HCC and liver transplantation	
15:45 -17:15	The next 20 years: Today's science, tomorrow's medicine	Environmental factors in IBD pathogenesis: Implications for prognosis, prevention and treatment	Acute pancreatitis: Up to date management	Liver tumours and obesity	Free Paper Session: Therapeutic biliopancreatic EUS	Advances and controversies in gastric malignancies	Management of the difficult patient with IBS	Challenges in the diagnosis and treatment of rectal cancer	Free Paper Session: Today's science; tomorrow's medicine: Obesity and cancer risk	Free Paper Session: IBD and malignancy	Free Paper Session: Endoscopic and surgical interventions in the oesophagus	Free Paper Session: Advanced imaging in endoscopy	Free Paper Session: GORD: Manifestations, management and complications	Free Paper Session: Gut mechanism of sedation and safety	Free Paper Session: A: Biliary neoplasia; B: basic mechanisms of liver injury (3 and 3 abs)	

Basic Science Cancer Chairman's Choice Endoscopy *H. Pylori* / Stomach Histopathology IBD Liver Neurogastroenterology **Nutrition and Small Intestine** Obesity-related disease Oesophagus Paediatric Pancreas Primary Care Radiology Surgery

Nutrition and Small Intestine

Saturday Sunday Monday **Tuesday** Wednesday

Tuesday, October 23, 2012

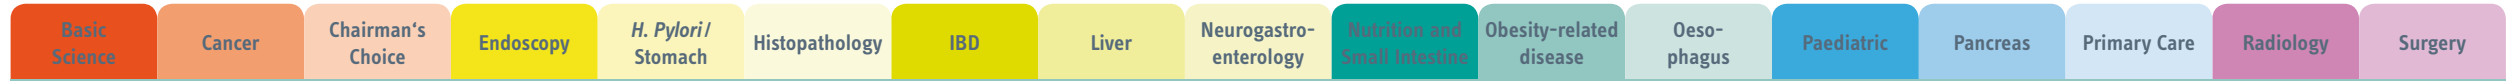

Time/Halls	Hall 4/5	Auditorium	Elicium 2	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	D203/204	E104/105	E106/107	E103
08:30 - 10:30	Live endoscopy	Developments in bowel cancer screening	New therapeutic approaches for IBD: From bench to bedside	How to keep the decompensated cirrhotic alive: Case-based sessions	Free Paper Session: Popular Late Breakers	Free Paper Session: Coeliac disease	Current issues in GORD management	Free Paper Session: Viral hepatitis: Clinical and basic	Obesity and carcinogenesis: Adipokines and energy balance	Cystic fibrosis: Moving from children to adults	Molecular pathology & genetics of IBD	Free Paper Session: Upper GI diseases: Endoscopic diagnosis and management	Free Paper Session: Modern management of gastric cancer	Horizon 2020: Larger funds than ever for researchers	Free Paper Session: Pancreatic cancer: From pathophysiology to diagnosis and treatment
11:00 - 12:30	Live endoscopy	Cochrane Symposium: Evidence-base for disease prevention: Past and future	Free Paper Session: IBD safety and Infections	Management of chronic hepatitis B in 2012	Clinical challenges in dysphagia management (including EoE)	Recent major advances in pancreatology	Clinics in Gastroenterology and Hepatology 2: Lower GI	Complications of bariatric surgery	Obesity and carcinogenesis: Host intestinal microbiota interactions	Free Paper Session: H. pylori infection management and gastric tumorigenesis	Free Paper Session: IBD pathogenesis and microbiota	Free Paper Session: Progression of Barrett's to adenocarcinoma	Free Paper Session: Colorectal surgery	Free Paper Session: Progress in severe GI motility diseases	Free Paper Session: Insights into colorectal cancer pathogenesis
12:45 - 13:45	Oesophageal stenting: Tips for success	Severe gastric atrophy and intestinal metaplasia in the stomach: What follow-up?	Drug development in functional GI disorders: How should it be achieved?	Lunch Sessions (Rooms G102 – G109)											
				Best practice in colonoscopic surveillance after polypectomy	Balancing efficacy and safety of immunosuppressants in IBD	Who are the patients that really benefit from a noninvasive diagnosis of liver fibrosis	Management of acute diverticulitis	Management of pancreatic collections							
14:00 -15:30	Live endoscopy	Best of DDW	New insights into IBD pathogenesis	Hepatocellular carcinoma management in 2012: A multidisciplinary approach	New treatment targets for functional GI disorders and GI motility diseases	Improving outcomes in colorectal cancer	Dyspepsia in the community	Advances in clinical nutrition	Obesity and carcinogenesis: ER stress, oxidative stress and autophagy	Free Paper Session: Late Breakers - and Choice	Basic Science Workshop 2: Mechanism of pain development in GI-disease - Do we know enough?	Free Paper Session: Microbiota in IBD: Therapeutic interventions	Free Paper Session: Progress in capsule endoscopy	Free Paper Session: Neuroimmune interactions in the GI tract: From bench to bedside	Free Paper Session: Acute Pancreatitis: From Bench to Bedside
15:45 -17:15	Video Case Session	Helicobacter pylori treatment: How and in whom?	Free Paper Session: Novel therapies in IBD	Common incidental findings affecting the liver and how to manage them	Placebos and placebo effects in gastroenterology	Palliation of advanced colorectal cancer	Free Paper Session: Brain-gut interactions	Management of obesity and the metabolic syndrome	Free Paper Session: NAFLD: Clinical and basic	Free Paper Session: Colonoscopic resection of large polyps	Free Paper Session: Diagnosis and outcome of oesophageal cancer	Free Paper Session: Imaging in IBD management	Free Paper Session: Stool-based screening for colorectal cancer	Free Paper Session: Signalling in healthy and inflamed intestinal mucosa	Free Paper Session: Pancreatic disease: Fibrosis, inflammation and signalling

Nutrition and Small Intestine

Saturday Sunday Monday Tuesday **Wednesday**

Wednesday, October 24, 2012

Free Paper Session: Microbiota in IBD: Therapeutic interventions	Free Paper Session: Progress in capsule endoscopy	Free Paper Session: Neuroimmune interactions in the GI tract: From bench to bedside	Free Paper Session: Acute Pancreatitis: From Bench to Bedside
15:45 - 17:15	Video Case Session	Helicobacter pylori treatment: How and in whom?	Free Paper Session: Novel therapies in IBD	Common incidental findings affecting the liver and how to manage them	Placebos and placebo effects in gastroenterology	Palliation of advanced colorectal cancer	Free Paper Session: Brain-gut interactions	Management of obesity and the metabolic syndrome	Free Paper Session: NAFLD: Clinical and basic	Free Paper Session: Colonoscopic resection of large polyps	Free Paper Session: Diagnosis and outcome of oesophageal cancer	Free Paper Session: Imaging in IBD management	Free Paper Session: Stool-based screening for colorectal cancer	Free Paper Session: Signalling in healthy and inflamed intestinal mucosa	Free Paper Session: Pancreatic disease: Fibrosis, inflammation and signalling

Oesophagus

Saturday Sunday Monday Tuesday **Wednesday**

Wednesday, October 24, 2012

Time/Halls	Hall 4/5	Auditorium	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	E104/105	E103				
08:00 - 10:30		Future vision of endoscopy: European and Japanese perspectives	Cholestatic diseases in clinical practise: An update based on clinical cases	Coeliac disease: A changing paradigm?	Treatment of Barrett's oesophagus	Ulverative colitis: Difficult management issues	Free Paper Session: Anti-TNF therapy in IBD	Neuroendocrine tumours: Beyond octreotide	Free Paper Session: GORD: Evaluation, diagnosis and management	Free Paper Session: Colorectal cancer screening and surveillance	Free Paper Session: Complications of cirrhosis: Evaluation and management	Free Paper Session: New endoscopic and imaging technologies				
11:00 - 12:30		CT-colongraphy vs colonoscopy	Evidence based medicine in pancreatology	Bloating and abdominal distension: New insights into underlying mechanisms and clinical management	Modern management of oesophageal cancer	Clinics in Gastroenterology and Hepatology 3: Liver, Bile & Pancreas	Free Paper Session: New therapeutic targets in IBD	Bone mineral disease in GI disorders	Free Paper Session: NSAIDS and upper GI bleeding	Free Paper Session: Pancreatic EUS in diagnosis and treatment	Free Paper Session: Gallstones and other biliary diseases	Free Paper Session: Prognosis and treatment of colorectal cancer				
12:45-13:45	How to deal with gluten sensitivity	Psychological treatment options for patients with IBS	Lunch Sessions (Rooms G102 – G109)													
			Managing anti-TNF therapy: Starting and loss of response	Pitfalls in autoimmune pancreatitis	How to advise colleagues regarding hepatitis B patients undergoing immunosuppression	Management of acute lower GI bleeding	Treatment of end-stage jaundice / palliative biliary drainage									
14:00 -15:30			Alcoholic and non-alcoholic liver disease: Staging and treatment	Effect of food on GI function and dysfunction	Management of complications of pancreatic and biliary surgery	IBD: A personalised medicine approach	Biology and treatment of GISTs (Gastro-intestinal stromal tumours)	Free Paper Session: Course and outcomes of IBD	Free Paper Session: Upper GI bleeding: An international perspective	Free Paper Session: ESD: The way to go?	Free Paper Session: New pharmacological treatment options for lower GI diseases	Free Paper Session: Colorectal cancer biomarkers

[Saturday](#) [Sunday](#) [Monday](#) [Tuesday](#) [Wednesday](#)

Saturday, October 20, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium	Elicium 1
09:00 - 10:30	Management of GI and liver emergencies			
11:00 - 13:00	Live endoscopy	Case-based update on management of viral hepatitis	Nutrition in IBD and other GI disorders	Fistulizing Crohn's disease
14:00 - 16:30	Live endoscopy	Hepatocellular carcinoma	Characterising and managing IBD today	Management of pancreatic and biliary cancer

Sunday, October 21, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium
08:30 - 10:30	ERCP update	Alcohol and liver disease	Modern medical and surgical management of difficult GORD
11:00 - 13:00	Colonoscopy challenges	What is new and what is controversial about NAFLD?	Assessment and treatment of motility disorders: Medical and surgical issues
14:00 - 16:00	The multidisciplinary approach to morbid obesity		

Paediatric

Saturday Sunday **Monday** Tuesday Wednesday

Monday, October 22, 2012

Time/Halls	Hall 4/5	Auditorium	Elicium 2	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	D203/204	E104/105	E106/107	E103
08:00 - 10:30	Opening Plenary														
11:00 - 12:30	European Integration in Digestive Diseases: Successes and possibilities	Multidisciplinary challenges in ulcerative colitis: The medical/surgical partnership	Endoscopy meets Pathology: EMR and ESD	Management of chronic hepatitis C in 2012	Functional GI disorders: From children to adults	Barrett's oesophagus: How big is the cancer risk and how should we deal with it?	Clinics in Gastroenterology and Hepatology 1: Upper GI	Colorectal cancer therapy: New targets and biomarkers	Obesity and carcinogenesis: Insights into the obesity-cancer link from human observational studies	Free Paper Session: Immunosuppressive therapy in IBD	Free Paper Session: Improving accuracy in the diagnosis and management of colonic cancer	Free Paper Session: Biliary and pancreatic duct stenting	Free Paper Session: Gastric protection in upper GI bleeders	Free Paper Session: Optimising endotherapy of upper GI cancer	Free Paper Session: Intestinal ischaemia and short bowel syndrome
12:45 -13:45	Management of the patient with refractory nausea and vomiting	Upper GI bleeding: Tips and tricks	Pregnancy and IBD	Approach to treatment of perianal Crohn's disease	Adenoma of the papilla vateri: Endoscopic therapy/Surgical therapy	How I manage patients with severe alcoholic hepatitis	How I manage side effects in patients treated with triple therapy for hepatitis C	Surveillance of high risk groups for colorectal cancer							
14:00 -15:30	The last 20 years: Lasting paradigm changes in digestive disease management	East meets West: Global perspectives on IBD and its mimics	Therapeutic EUS: Standards and perspectives	Genes and lifestyle: Role in liver disease	Nerve-immune interactions in the GI tract in health and disease	Epidemiology, detection and treatment of early gastric cancer	Management of groups at high risk of colorectal cancer	Free Paper Session: Endoluminal treatment of achalasia	Obesity and carcinogenesis: Metabolic syndrome, inflammation and carcinogenesis	Free Paper Session: Predictors of therapeutic outcome in IBD	Basic Science Workshop 1: Oncological decision making in 2012 - Are there reliable markers?	Free Paper Session: Diagnostic and interventional biliary endoscopy	Free Paper Session: Radiofrequency ablation of Barrett's oesophagus	Free Paper Session: Oesophageal motility disorders	Free Paper Session: HCC and liver transplantation
15:45 -17:15	The next 20 years: Today's science; tomorrow's medicine	Environmental factors in IBD pathogenesis: Implications for prognosis, prevention and treatment	Acute pancreatitis: Up to date management	Liver tumours and obesity	Free Paper Session: Therapeutic biliopancreatic EUS	Advances and controversies in gastric malignancies	Management of the difficult patient with IBS	Challenges in the diagnosis and treatment of rectal cancer	Free Paper Session: Today's science; tomorrow's medicine: Obesity and cancer risk	Free Paper Session: IBD and malignancy	Free Paper Session: Endoscopic and surgical interventions in the oesophagus	Free Paper Session: Advanced imaging in endoscopy	Free Paper Session: GORD: Manifestations, management and complications	Free Paper Session: Gut mechanism of satiation and satiety	Free Paper Session: A: Biliary neoplasia; B: basic mechanisms of liver injury (3 and 3 abs)

Paediatric

Saturday Sunday Monday **Tuesday** Wednesday

Tuesday, October 23, 2012

Time/Halls	Hall 4/5	Auditorium	Elicium 2	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	D203/204	E104/105	E106/107	E103
08:30 - 10:30	Live endoscopy	Developments in bowel cancer screening	New therapeutic approaches for IBD: From bench to bedside	How to keep the decompensated cirrhotic alive: Case-based sessions	Free Paper Session: Popular Late Breakers	Free Paper Session: Coeliac disease	Current issues in GORD management	Free Paper Session: Viral hepatitis: Clinical and basic	Obesity and carcinogenesis: Adipokines and energy balance	Cystic fibrosis: Moving from children to adults	Molecular pathology & genetics of IBD	Free Paper Session: Upper GI diseases: Endoscopic diagnosis and management	Free Paper Session: Modern management of gastric cancer	Horizon 2020: Larger funds than ever for researchers	Free Paper Session: Pancreatic cancer: From pathophysiology to diagnosis and treatment
11:00 - 12:30	Live endoscopy	Cochrane Symposium: Evidence-base for disease prevention: Past and future	Free Paper Session: IBD safety and Infections	Management of chronic hepatitis B in 2012	Clinical challenges in dysphagia management (including EoE)	Recent major advances in pancreatology	Clinics in Gastroenterology and Hepatology 2: Lower GI	Complications of bariatric surgery	Obesity and carcinogenesis: Host intestinal microbiota interactions	Free Paper Session: H. pylori infection management and gastric tumorigenesis	Free Paper Session: IBD pathogenesis and microbiota	Free Paper Session: Progression of Barrett's to adenocarcinoma	Free Paper Session: Colorectal surgery	Free Paper Session: Progress in severe GI motility diseases	Free Paper Session: Insights into colorectal cancer pathogenesis
12:45 - 13:45	Oesophageal stenting: Tips for success	Severe gastric atrophy and intestinal metaplasia in the stomach: What follow-up?	Drug development in functional GI disorders: How should it be achieved?	Best practice in colonoscopic surveillance after polypectomy	Balancing efficacy and safety of immunosuppressants in IBD	Who are the patients that really benefit from a noninvasive diagnosis of liver fibrosis	Management of acute diverticulitis	Management of pancreatic collections							
14:00 -15:30	Live endoscopy	Best of DDW	New insights into IBD pathogenesis	Hepatocellular carcinoma management in 2012: A multidisciplinary approach	New treatment targets for functional GI disorders and GI motility diseases	Improving outcomes in colorectal cancer	Dyspepsia in the community	Advances in clinical nutrition	Obesity and carcinogenesis: ER stress, oxidative stress and autophagy	Free Paper Session: Late Breakers - 2nd Choice	Basic Science Workshop 2: Mechanism of pain development in GI-disease - Do we know enough?	Free Paper Session: Microbiota in IBD: Therapeutic interventions	Free Paper Session: Progress in capsule endoscopy	Free Paper Session: Neuroimmune interactions in the GI tract: From bench to bedside	Free Paper Session: Acute Pancreatitis: From Bench to Bedside
15:45 -17:15	Video Case Session	Helicobacter pylori treatment: How and in whom?	Free Paper Session: Novel therapies in IBD	Common incidental findings affecting the liver and how to manage them	Placebos and placebo effects in gastroenterology	Palliation of advanced colorectal cancer	Free Paper Session: Brain-gut interactions	Management of obesity and the metabolic syndrome	Free Paper Session: NAFLD: Clinical and basic	Free Paper Session: Colonoscopic resection of large polyps	Free Paper Session: Diagnosis and outcome of oesophageal cancer	Free Paper Session: Imaging in IBD management	Free Paper Session: Stool-based screening for colorectal cancer	Free Paper Session: Signalling in healthy and inflamed intestinal mucosa	Free Paper Session: Pancreatic disease: Fibrosis, inflammation and signalling

Primary Care

Saturday Sunday Monday Tuesday **Wednesday**

Wednesday, October 24, 2012

Time/Halls	Hall 4/5	Auditorium	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	E104/105	E103				
08:00 - 10:30		Future vision of endoscopy: European and Japanese perspectives	Cholestatic diseases in clinical practise: An update based on clinical cases	Coeliac disease: A changing paradigm?	Treatment of Barrett's oesophagus	Ulverative colitis: Difficult management issues	Free Paper Session: Anti-TNF therapy in IBD	Neuroendocrine tumours: Beyond octreotide	Free Paper Session: GORD: Evaluation, diagnosis and management	Free Paper Session: Colorectal cancer screening and surveillance	Free Paper Session: Complications of cirrhosis: Evaluation and management	Free Paper Session: New endoscopic and imaging technologies				
11:00 - 12:30		CT-colongraphy vs colonoscopy	Evidence based medicine in pancreatology	Bloating and abdominal distension: New insights into underlying mechanisms and clinical management	Modern management of oesophageal cancer	Clinics in Gastroenterology and Hepatology 3: Liver, Bile & Pancreas	Free Paper Session: New therapeutic targets in IBD	Bone mineral disease in GI disorders	Free Paper Session: NSAIDS and upper GI bleeding	Free Paper Session: Pancreatic EUS in diagnosis and treatment	Free Paper Session: Gallstones and other biliary diseases	Free Paper Session: Prognosis and treatment of colorectal cancer				
12:45-13:45	How to deal with gluten sensitivity	Psychological treatment options for patients with IBS	Lunch Sessions (Rooms G102 – G109)													
			Managing anti-TNF therapy: Starting and loss of response	Pitfalls in autoimmune pancreatitis	How to advise colleagues regarding hepatitis B patients undergoing immunosuppression	Management of acute lower GI bleeding	Treatment of end-stage jaundice / palliative biliary drainage									
14:00 -15:30			Alcoholic and non-alcoholic liver disease: Staging and treatment	Effect of food on GI function and dysfunction	Management of complications of pancreatic and biliary surgery	IBD: A personalised medicine approach	Biology and treatment of GISTs (Gastro-intestinal stromal tumours)	Free Paper Session: Course and outcomes of IBD	Free Paper Session: Upper GI bleeding: An international perspective	Free Paper Session: ESD: The way to go?	Free Paper Session: New pharmacological treatment options for lower GI diseases	Free Paper Session: Colorectal cancer biomarkers

Saturday Sunday Monday Tuesday Wednesday

Saturday, October 20, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium	Elicium 1
09:00 - 10:30	Management of GI and liver emergencies			
11:00 - 13:00	Live endoscopy	Case-based update on management of viral hepatitis	Nutrition in IBD and other GI disorders	Fistulizing Crohn's disease
14:00 - 16:30	Live endoscopy	Hepatocellular carcinoma	Characterising and managing IBD today	Management of pancreatic and biliary cancer

Sunday, October 21, 2012

Time/ Halls	Hall 4/5	Elicium 2	Auditorium
08:30 - 10:30	ERCP update	Alcohol and liver disease	Modern medical and surgical management of difficult GORD
11:00 - 13:00	Colonoscopy challenges	What is new and what is controversial about NAFLD?	Assessment and treatment of motility disorders: Medical and surgical issues
14:00 - 16:00	The multidisciplinary approach to morbid obesity		

Basic Science	Cancer	Chairman's Choice	Endoscopy	H. Pylori / Stomach	Histopathology	IBD	Liver	Neurogastroenterology	Nutrition and Small Intestine	Obesity-related disease	Oesophagus	Paediatric	Pancreas	Primary Care	Radiology	Surgery

Radiology and Imaging

Saturday Sunday **Monday** Tuesday Wednesday

Monday, October 22, 2012

Time/Halls	Hall 4/5	Auditorium	Elicium 2	Hall 2.1	Hall 3.1	Elicium 1	Forum	Hall 3.2	Emerald Room	E102	D201/202	D203/204	E104/105	E106/107	E103	
08:00 - 10:30	Opening Plenary															
11:00 - 12:30	European Integration in Digestive Diseases: Successes and possibilities	Multidisciplinary challenges in ulcerative colitis: The medical/surgical partnership	Endoscopy meets Pathology: EMR and ESD	Management of chronic hepatitis C in 2012	Functional GI disorders: From children to adults	Barrett's oesophagus: How big is the cancer risk and how should we deal with it?	Clinics in Gastroenterology and Hepatology 1: Upper GI	Colorectal cancer therapy: New targets and biomarkers	Obesity and carcinogenesis: Insights into the obesity-cancer link from human observational studies	Free Paper Session: Immunosuppressive therapy in IBD	Free Paper Session: Improving accuracy in the diagnosis and management of colonic cancer	Free Paper Session: Biliary and pancreatic duct stenting	Free Paper Session: Gastric protection in upper GI bleeders	Free Paper Session: Optimising endotherapy of upper GI cancer	Free Paper Session: Intestinal ischaemia and short bowel syndrome	
12:45 -13:45	Management of the patient with refractory nausea and vomiting	Upper GI bleeding: Tips and tricks	Pregnancy and IBD	Lunch Sessions (Rooms G102 – G109)				Approach to treatment of perianal Crohn's disease	Adenoma of the papilla vateri: Endoscopic therapy/Surgical therapy	How I manage patients with severe alcoholic hepatitis	How I manage side effects in patients treated with triple therapy for hepatitis C	Surveillance of high risk groups for colorectal cancer				
14:00 -15:30	The last 20 years: Lasting paradigm changes in digestive disease management	East meets West: Global perspectives on IBD and its mimics	Therapeutic EUS: Standards and perspectives	Genes and lifestyle: Role in liver disease	Nerve-immune interactions in the GI tract in health and disease	Epidemiology, detection and treatment of early gastric cancer	Management of groups at high risk of colorectal cancer	Free Paper Session: Endoluminal treatment of achalasia	Obesity and carcinogenesis: Metabolic syndrome, inflammation and carcinogenesis	Free Paper Session: Predictors of therapeutic outcome in IBD	Basic Science Workshop 1: Oncological decision making in 2012 - Are there reliable markers?	Free Paper Session: Diagnostic and interventional biliary endoscopy	Free Paper Session: Radiofrequency ablation of Barrett's oesophagus	Free Paper Session: Oesophageal motility disorders	Free Paper Session: HCC and liver transplantation	
15:45 -17:15	The next 20 years: Today's science; tomorrow's medicine	Environmental factors in IBD pathogenesis: Implications for prognosis, prevention and treatment	Acute pancreatitis: Up to date management	Liver tumours and obesity	Free Paper Session: Therapeutic biliopancreatic EUS	Advances and controversies in gastric malignancies	Management of the difficult patient with IBS	Challenges in the diagnosis and treatment of rectal cancer	Free Paper Session: Today's science; tomorrow's medicine: Obesity and cancer risk	Free Paper Session: IBD and malignancy	Free Paper Session: Endoscopic and surgical interventions in the oesophagus	Free Paper Session: Advanced imaging in endoscopy	Free Paper Session: GORD: Manifestations, management and complications	Free Paper Session: Gut mechanism of satiation and satiety	Free Paper Session: A: Biliary neoplasia; B: basic mechanisms of liver injury (3 and 3 abs)
