

ESGE STUDY EURODISSEC
European registry of ESD in the GI-tract.

Protocol

Aims

To establish a common platform for a registry on the use of ESD (Endoscopic Submucosal Dissection) in the GI-tract

Inclusion

Endoscopic centers/unit performing ESD in the GI-tract

Study schedule

At present, centers should use the EURODISSEC CRF, to monitor the local use of ESD.

In May 2010, the ESGE Research Committee will collect status on the use of the EURODISSEC CRF's from participating centers to evaluate the need and possibilities of an on-line registry.
