WORD OF WELCOME

Dear colleagues,

It is our pleasure to invite you to the 9th Sarajevo Annual Gastroenterology Conference which will take place on the 4th and 5th of April 2013. The Learning objectives of the upcoming conference are focused on recent advances in urgent gastroenterology interventions as management of failed interventions and complications. The format of the symposia includes presentations and demonstrations by regional and international experts with two state-of-the-art lectures and a symposium for nurses.

The concept of the conference is based on the extremely positive response at our previous meetings. Live endoscopy workshop will be directly transmitted from our Endoscopy Unit to the Conference Venue. The event is of interest for gastroenterologists, oncologists, internists, surgeons, nurses, residents and medical students.

The conference will take place at the «Dom Mladih» Convention Centre, located at the centre of Sarajevo. We are delighted to have you attend our Gastroenterology Conference, live through the atmosphere of Sarajevo and enjoy well-known Bosnian hospitality.

Sincerely,

Nenad Vanis, MD, PhD
Chairman of the Organizing Committee
About the Annual Gastroenterology Conference in Sarajevo

The goal of the 9th edition of our traditional Annual Gastroenterology Conference is to promote gastroenterohepatology in Bosnia and Herzegovina and the region. We have kept the same successful format of this conference over the years: a mixture of lectures and workshop with live demonstrations of endoscopic techniques and satellite symposia for nurses. Following the tradition of excellence of this conference we are proud that this meeting has become a leading gastroenterology meeting for this part of Europe.

The Gastroenterology Association of Bosnia and Herzegovina has around 150 members and, in addition to gastroenterologists, it includes: abdominal surgeons, radiologists, pathologists, GIPs and medical staff. The Association has one goal, and one goal only, which is to promote and develop gastroenterology and hepatology so it will ensure a brighter future of those in whose interest all your work is done - our patients!

The Association has the goal of offering guidelines for the best clinical practice in endoscopy procedures, hepatology, IBD, GI oncology and nutrition.

We hope that our activities will contribute to promote Bosnia and Herzegovina as a country well-known for it's high-class gastroenterohepatology.
