Dear Colleagues,

we invite you to improve your skills in endoscopic analysis, therapeutic decision making and endoscopic resection of early neoplasias of the gastrointestinal tract:

- Accurate endoscopic assessment of surface and microvascular structure for prediction of pT category
- Indications for endoscopic versus minimal invasive surgical resection techniques
- Techniques for endoscopic en-bloc resection and suturing

This meeting focuses on all aspects to optimize endoscopic analysis and staging of neoplasias as well as strategies and performance of minimally invasive resections – to enhance proficiency in this new field.

We hope to stimulate your interest and welcome you to the Endo Skill Update 2019.
