36th GEEW

GEEW (Gastroenterology and Endotherapy European Workshop) focuses on endoscopic approach to digestive diseases and its integration in the multimodal management. It relies on State of the Art lectures and live video demonstrations performed at Erasme Hospital by local physicians in collaboration with international renowned experts.

During the procedures, a panel of experts answers the questions of the audience and comments on the procedures, their indications, the way to prevent complications and the pre- and post-therapeutic work-up.

It also includes “Questions and Answers” sessions and lectures entitled “Tips and Tricks” or “How I do it” which are focused on some difficult aspects of therapeutic endoscopy.

An up-to-date literature review is commented and discussed throughout the meeting in relation with the procedures.

The major goals of the event are

- To clearly describe the pre-therapeutic planning and the post-procedural follow-up in digestive therapeutic endoscopy.
- To integrate the endoscopic therapy into the multidisciplinary management of the patient.
- To focus on safety and modalities to prevent complications.
- To teach the technical aspects and tricks in advanced diagnostic and therapeutic endoscopy.

- To put all these features in line with the most recent evidence based medicine.
