## Welcome

Dear friends and colleagues,

welcome to Santiago de Compostela, at the Department of Gastroenterology and Hepatology at the University Hospital of Santiago de Compostela, and at the University of Santiago de Compostela for the 17th edition of EURO-EUS.

This year the Executive Board has decided to move into a new exciting topic, the straight collaboration between Endoscopic Ultrasound and Oncology. We will focus on define and discuss on indications of diagnostic and therapeutic EUS in different oncological indications, leaded by the

most important experts on the field worldwide and we will try to reach to a consensus on the best management of these diseases.

Furthermore, you will be extensively exposed to live cases transmitted from the Endoscopy Unit of the Department of Gastroenterology and Hepatology, from the Florida Center of Interventional Endoscopy and the Asian Institute of Gastroenterology, two of the most renowned Endoscopy Centers all over the world. EURO-EUS Faculty will perform all the different diagnostic and therapeutic endoscopic and EUS procedures indicated in all different type of diseases.

Like during the past edition, we have scheduled a HANDS-ON TRAINING PROGRAM that, following the sold-out sessions organized previous years, has been divided in two sessions covering the whole day, allowing to a higher selected number of participants to improve their EUS skills under the supervision of a Team of Trainers.

So welcome again and let's have a great EURO-EUS 2020!!!

Erwin Santo, Julio Iglesias Garcia, Paolo Giorgio Arcidiacono

## **Wednesday 4<sup>th</sup> March**

### Hands-on training course

6 fully equipped EUS Stations will be available and run under supervision of a selected Team of Trainers who will guide the participants through all the EUS Stations. The hands-on activity will cover all the topics of diagnostic and therapeutic EUS. Different set of animal models provided by Endosim Company will allow participants to perform an extensive hands-on training program on: EUS-core biopsy, Pancreatic Cyst FNA, FNA of solid lesions: pancreatic mass, liver mass and lymph node, Pancreatic pseudocyst drainage: plastic stents, Pancreatic pseudocyst drainage: Axios, Accessory imaging devices, EUS-guided biliary access and EUS fiducials. All the state of the art EUS instruments will be available to try during the sessions
