

ESGE news and upcoming events

June 2022

The ESGE Days Congresses

We would like to warmly invite you to 'save the date' for ESGE Days 2023 in Dublin, taking place April 20–22, 2023.

Meanwhile, ESGE Days 2022 is still available for all registered delegates on-demand. Did you miss some crucial presentations from the congress? Or would you like to revisit a session? Simply log back into the digital platform and access the content on-demand until June 30, 2022.

Visit our congress website to keep up to date with announcements: esgedays.org

New Guideline

Guideline

Endoscopic submucosal dissection for superficial gastrointestinal lesions: ESGE Guideline – Update 2022
P. Pimentel-Nunes, D. Libânio, B. A. J. Bastiaansen et al.
 Please see page 591–622 in this issue of *Endoscopy*.

Superficial gastrointestinal lesions are being detected and diagnosed more commonly, and endoscopic resection is a mainstay treatment for them. In this updated ESGE Guideline on ESD for such lesions, recommendations are made for evaluation, treatment, and post-resection management, with special emphasis on the ESD technique. The Guideline addresses major issues, including evaluation

before ESD, comparison with other therapeutic strategies (namely endoscopic mucosal resection [EMR] and surgery), and management after ESD, to inform and underpin the use of this fundamental technique for the treatment of superficial GI lesions.

New module available on myESGEtutor!

The ESGE eLearning Group is very pleased to invite you to explore their new myESGEtutor module:

Module 7: Evidence based medicine in gastrointestinal endoscopy

Dr Antonio Facciorusso is part of the team behind the new module; "I hope ESGE members will grab the opportunity to log in, enjoy and further develop their skills. They will have the opportunity to learn how to assess the quality of available evidence in the literature and how to interpret the results of a meta-analysis. Also, for those thinking of applying for an ESGE fellowship grant, remember to download your certificate of attendance because completing relevant myESGEtutor modules is considered an additional point for fellowship grant applicants!"

Dr Antonio Facciorusso

To access myESGEtutor, log into your ESGE membership page and register for access. You will then receive a personalized log in to myESGEtutor.

When will we see you again?

Attend the following ESGE endorsed events and take advantage of the registration fee reduction as an ESGE individual member.

EUS semi-live in Amsterdam

June 10, 2022
 RAI Amsterdam, Netherlands
<https://epgs.nl/>

Karolinska Live

June 16–17, 2022
 Hilton Stockholm Slussen, Sweden
<https://karolinskalive.com/>

39th GEEW

June 19–21, 2022
 Brussels Expo and Live Streaming (Hybrid Event), Belgium

Check the events calendar on esge.com for full details of all events of interest and the locations of ESGE booths.
