**EUS-ERCP connection:  
the “EURCP” concept**  
An International Endoscopic  
Hybrid EGEUS event

NH Hotel Torino Centro  
Turin 15-17 Dec 2022

Dear friends & colleagues,

We are delighted to invite you to the sixth edition of our International EGEUS Live Course, EUS-ERCP connection: The "EURCP" concept. The first edition was held in 2012 and the course was only a national one, but it attracted more than 60 participants. In 2014, the Course shifted towards an International one and we collected more than 150 enthusiastic participants. In 2016 and 2018, the third and fourth editions were very successful with more than 220 participants.

Then came the COVID 2019 pandemic and in 2020, the Course has been a great success but completely digital, with more than 700 online participants, from more than 60 countries worldwide and live connections from a lot of centers both in Italy and abroad (Rome, Milan, Budapest, Hong Kong, Copenhagen, Cairo and Mumbai). But in 2022 our hope is to leave behind the pandemic and meet again all together in person, without abandoning the great possibilities of a worldwide expanded audience. Since our first meeting it has been our goal to highlight the most updated developments in EUS and ERCP and their combined use, summed up in the new concept of EURCP which includes a whole world of new ideas and ways to approach the biliopancreatic pathology from both a diagnostic and therapeutic point of view. All this together with the new diagnostic and therapeutic ancillary techniques and newly developed devices, such as peroral cholangioscopy and pancreatoscopy, intraductal ultrasound and probe-based confocal laser endomicroscopy, the new LAMS and more. Participants will be able to see live demonstrations of high quality EUS +/-FNA/FNB procedures, EUS-guided therapeutic and ERCP techniques and at the same time will have a fantastic view into the most recent advances in diagnostic and therapeutic endoscopic management of patients with biliopancreatic diseases. All the procedures will be performed by our fantastic guests and local Faculty.

The theoretical part of the Conference will encompass a varied and comprehensive program of lectures, discussions and video presentations by experts from different countries in addition to a Symposium for Nurses on Saturday, December, 17th. The official language of the Course will be English. The Congress venue will be in the ancient center of Turin, conference centre: Hotel NH Torino Centro and the live in Molinette Hospital. The renewed possibility of an in person participation will also allow you to enjoy the fantastic tourism opportunities offered by Turin (shopping, museums, other artistic venues, high quality restaurants) and the fantastic Turin Christmas atmosphere, as in the previous editions, pre-COVID era. It is an honor and a pleasure to invite you to participate in person in Turin or at least online, to our hybrid event: the 6th edition of the EUS-ERCP connection: the EURCP concept, International EGEUS live Course, on December 15-17, 2022.

# SCIENTIFIC RATIONALE

Aim of the Course is to highlight the most updated developments in EUS and ERCP and their combined use, summed up in the new concept of EURCP which includes a whole world of new ideas and ways to approach the biliopancreatic pathology from both a diagnostic and therapeutic point of view. All this together with the possibility of a deep insight into the new diagnostic and therapeutic ancillary techniques and newly developed devices, such as peroral cholangioscopy and pancreatoscopy, intraductal ultrasound and probe-based confocal laser endomicroscopy, the new LAMS and more. Participants will be able to see live demonstrations of high quality EUS +/-FNA/FNB procedures, EUS-guided therapeutic and ERCP techniques and at the same time will have a fantastic view into the most recent advances in diagnostic and therapeutic endoscopic management of patients with biliopancreatic diseases. The theoretical part of the Conference will encompass a varied and comprehensive program of lectures, discussions and video presentations by experts from different countries and the participants will be able to experience and learn about the most important hepato-biliary and pancreatic pathologies and their up-to-date management both clinical and endoscopic.
